

GUARDIT® PAVING AND CONCRETE CLEANER

GuardIT® Paving & Concrete Cleaner is a heavy duty, water based degreaser which contains revolutionary, high performance Soy solvent for the safe removal of industrial grease, oil, dirt and grime from hard surfaces including tiles, concrete, brick and other surfaces. It is also safe to use on painted and metal surfaces.

- ✓ High Performance
- ✓ Non-toxic and non-corrosive
- ✓ Non-hazardous
- ✓ Non-flammable
- ✓ Ideal for daily use
- ✓ Low foaming
- ✓ Works on solid concrete surfaces
- ✓ 100% Bio-degradable
- ✓ User friendly and safe
- ✓ Does not affect nearby plants and vegetation

Heavy foot traffic and impact often lead to degradation of concrete and paving surfaces. It requires the use of quality cleaning products if you want to increase its shelf life.

The accumulated dust can damage the surface significantly. Water alone cannot remove the stubborn stains and grease which is why you need an industrial strength concrete cleaner.

The chemical is diluted with water and then sprayed directly on to the area. Whether you want to remove oil from your driveway or clean grime from your concrete or paving walkways, we recommend using bio-degradable cleaning products.

This specially formulated product emulsifies the oil and removes dirt and dust without causing any harm to your hard surface. It works by removing stains, grime, grease and at the same time prevents the growth of mould and bacteria on the concrete surface.

GuardIt offers a simple way of cleaning without using any specialised tools or high-pressure water and works on even the dirtiest paving without causing any harm to the environment, your plants or people around.
